What is Promethean ActivEngage?

Promethean ActivEngage sets the standard in assessment software for tablets, smartphones and traditional computers, perfect for schools considering or implementing Tablet, 1:1 computing and BYOD (Bring Your Own Device) initiatives.

Why Promethean ActivEngage?

- **Encourages Communication and Collaboration** – ActivEngage encourages students to engage, interact and contribute to lessons instantly, creating collaborative discussions and lively debate.
- **Reduces Costs** - Leverages investments in existing technology, such as 1:1, Tablet and Bring Your Own Device (BYOD) initiatives. May be used with any mix of supported tablet devices, smartphones, traditional computers or even ActivExpression devices simultaneously. Turns any supported mobile device or computer into a Learner Response System.
- **Flexible** - Works with interactive whiteboards and projectors and even in environments where no interactive display system or projector is available.
- **Saves Time** - Reduces time spent on administrative tasks, allowing more time for student instruction. Reduces or eliminates the need to grade and record paper-based assessments.

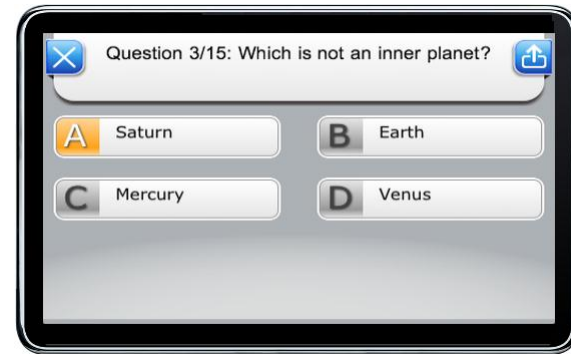

Why Promethean ActivEngage?

- **Centrally Controlled and Scalable** – Delivers virtual voting capability across a single classroom, entire campus or beyond. ActivEngage can be managed at a class level or centrally on a networked server.
- **Supports Personalized Learning** – With real-time feedback, instructors can track individuals' progress and improve learning outcomes by intervening as required.
- **Connects Assessment to Instruction** – Allows Teachers to continuously gauge classroom comprehension and adjust instruction throughout the lesson to improve understanding of key concepts.
- **Enables Instructional Management** – Fully functional with ActivProgress, provides the ability to gauge student comprehension, receive instructional support, collaborate with key stakeholders and spot student trends before they become an issue.

How It Works

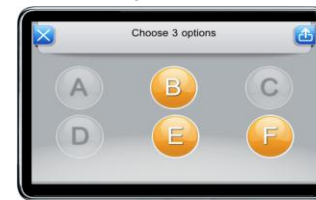

- Instructor sends question(s) to learners via ActivInspire or Promethean ActivOffice.
- Learners respond using a keyboard, mouse or touch, depending on their device.
- Results may displayed by device-name or may be kept anonymous.
- Results may be exported to Microsoft Excel for further analysis.

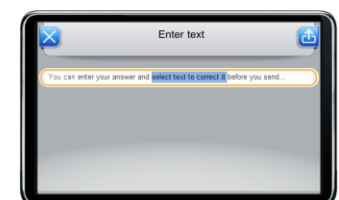

ActivEngage: Questioning to suit needs

- Wide range of question types** – Instructors can deliver a wide range of question types – Text, Multiple Choice, True/False, Y/N, Multiple Response, Sort-In-Order or Likert Scales.
- Pre-prepared or ad-hoc** – Instructors can pre-prepare questions ahead of the session as part of the session or they can ‘poll’ instantaneously to gauge understanding or glean immediate feedback.
- Supports Self-Paced Learning** – Allows teachers to assign questions of varying difficulty and gives students the opportunity to register answers at their own pace. Educators can poll the class to determine comprehension then review or re-teach if necessary.

ActivEngage: Additional Features & Benefits

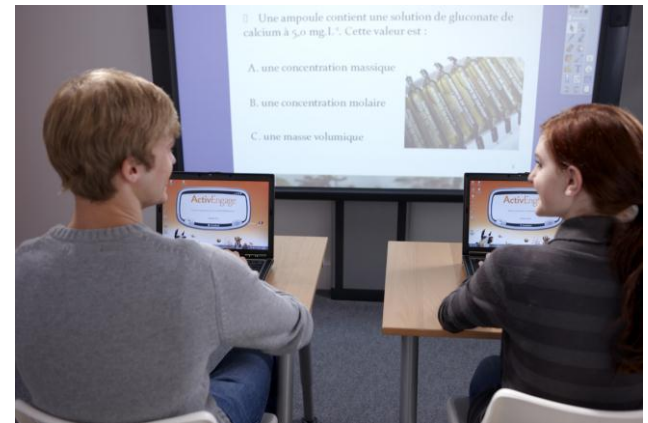

- **Multi platform** – ActivEngage works on both Windows and Mac computers in addition to iOS and Android mobile devices. Customers can mix-and-match device types.
- **Compatible** – ActivEngage seamlessly integrates with Promethean products and works in non-Promethean environments
 - ActivEngage works with any type or brand of interactive display system or Projector. Also works in learning environments with no display.
 - ActivEngage can be used alongside ActivExpression handsets in the same response session.
 - ActivEngage may be used with either ActivInspire or Promethean ActivOffice.
- **Multi language** – 15 languages supported - see Spec Sheet for full details.
- **Free Trial** – ActivEngage can be downloaded free of charge for trial purposes at Promethean Planet – the only restriction is it is limited to three 'Clients'.

Promethean **ActivOffice**

Ordering ActivEngage

- ActivEngage is ordered based on the number of users (Clients) who will need to connect to the Server at a given time.
- Subscription and Perpetual licensing available
 - For subscription licenses, support and upgrades are included for the life of the subscription.
 - For perpetual licenses, support and upgrades are included for the first year. Extended support is available for purchase.
 - All licenses must be registered to receive support – Customers have 90 days to register.
- Licence key(s) issued to end-Customer. License key is entered on the server computer and enables the specified number of users (Clients) purchased to connect to the Server.
- Customers may request a copy of ActivInspire Professional Edition (or Promethean ActivOffice) for every 30 users of ActivEngage purchased.
- Volume pricing tiers available.

Summary

- Turns any supported computer or mobile device into a Learner Response System.
- Enables anywhere, anytime learning, both inside and outside of the classroom.
- Reduces time spent on administrative tasks - lesson preparation, grading tests, recording grades, etc., giving teachers more time for student instruction.
- Delivers voting capability with a single classroom or school, across an entire campus and beyond.
- Leverages investments in existing technologies and works with Tablets, Smartphones and traditional computers.
- Works with any brand of interactive display system or projector – also works without a display.
